PROFESSIONAL SUMMARY

I am a dedicated professional focused on the seamless integration of machine learning into scalable web solutions. My experience spans the full development lifecycle, including front-end design, server-side integration, and database management. This background demonstrates a readiness to tackle diverse tasks and acquire new skills in a high-speed setting. As a flexible team player, I prioritize rapid learning and critical thinking to solve evolving technical hurdles while bridging the gap between user-facing design and backend infrastructure.

EDUCATION

University of Santo Tomas | Manila City, Philippines **Aug 2023 - Jun 2026**

Bachelor of Science in Computer Science

Cum Laude

TECHNICAL EXPERIENCE

UnionBank of the Philippines **Apr 2026 - Jun 2026**

HR Technology Intern | Pasig City, Philippines

- Conducted User Acceptance Testing (UAT) for newly deployed Biometrics and QR Scanner validation system updates, and executed test scenarios for the primary financial tracking system's Pension module.
- Engineered multi-criteria lookup formulas to aggregate cumulative asset acquisitions, and deployed optimized calculation formula logic to minimize system latency during heavy dataset operations.
- Audited parallel datasets to isolate record anomalies, effectively identifying system value errors, ledger variance discrepancies, and over-withdrawal calculation defects.
- Collaborated in debugging efforts by logging system enhancement tickets for multi-transaction web UI auto-summation, and documented critical environment blockers following mobile application server rollbacks.

PROJECTS, AND COMPETITIONS

Temporal Action Recognition System | Undergraduate Thesis **Jan 2025 - Nov 2025**

Researcher & Developer | Python, HRNet, ED-TCN

- Co-authored and developed *"Shoplifting Recognition through Long-range Temporal Modeling using High-Resolution Network and Encoder-Decoder Temporal Convolutional Networks."*
- Focused on Temporal Action Segmentation, utilizing ED-TCNs to capture long-term dependencies in video data for behavioral analysis.
- Demonstrated proficiency in advanced Computer Vision techniques, moving beyond standard object detection to complex behavioral understanding.
- Led the preprocessing phase by converting unstructured video data into normalized keypoint sequences, effectively reducing model noise and improving the system's ability to distinguish between normal shopping behavior and suspicious concealment.

Breaking Enigma 2025: A National Hackathon Competition **November 2025**

Three-day Hackathon Event at Philippine Innovation Hub, Marikina

- 1 of the 30 selected teams out of 100+ applicants.
- Attended keynote sessions by prominent startup investors, applying their shared expertise in startup growth and digital innovation to our team's project proposal.
- Proposed a Centralized Digital Filipino Comic Hub as a Cultural Solution

PersonaForge | BPI DATA Wave Hackathon 2025 **Jun 2025 - Sep 2025**
AI/ML Engineer | OpenAI, Groq, Django

- Learned Prompt Engineering and User Persona from Eskwelabs
- Collaborated on the development of PersonaForge, an agentic AI system designed for each customer to deliver intelligent and hyper-personalized banking interactions.
- Designed and developed an AI-powered chatbot for BPI's Mobile App
- Integrated complex AI/ML components, including generative agent modeling, reinforcement learning, and sentiment detection, showcasing the ability to work with advanced technologies.

Payroll & Attendance System **Oct 2024 - May 2025**
Developer | Docker, ReactJS, Digital Ocean, GitHub

- Spearheaded the front-end development of a localized Payroll & Attendance solution. Beyond the client-side, I also took an active role in developing server-side integrations and database schemas, bridging the gap between user input and back-end processing for a workforce of 30+.
- Developed and implemented responsive user interfaces using ReactJS and Tailwind CSS, ensuring an optimal user experience across various devices.
- Primarily responsible for seamlessly integrating frontend with backend functionalities, utilizing Docker for containerization, Postman for API testing, and PostgreSQL for database management, deployed on Digital Ocean.

SKILLS

Technical: Docker, Digital Ocean, Figma, Tailwind CSS, ReactJS, Python, CSS, Java, Typescript/JavaScript, Flutter/Dart, GitHub, MySQL, Firebase, AI, Machine Learning, Computer Vision
Related Coursework: Machine Learning, Advanced Statistics & Probability, Data Structures & Algorithms, Data Visualization, Human-Computer Interaction
Soft Skills: Communication, Adaptability, Time management, Teamwork, Critical thinking, Problem solving
Languages: English, Filipino

CERTIFICATIONS

Explore Emerging Tech

- Issued January 2026
- Credential URL: https://www.credly.com/badges/621c2659-e8e9-4b9f-bc53-ac11a44d0095/linked_in_profile

Databases and SQL for Data Science with Python

- Issued November 2024
- Credential URL: https://www.coursera.org/account/accomplishments/verify/8HAB0EQ6UA8A

Responsive Web Design

- Issued August 2023
